

## Convenient 9-15kg Orbital Welding Spring Balancer Used With Welding Torch

### Basic Information

### Product Specification

- Highlight: 15kg Spring Balancer,  
Welding Torch Spring Balancer,  
Convenient Orbital Balancer

## Product Description

### Balancer

#### Description

The balancer is a mechanical mechanism specially designed for the operation of the tube-sheet welding torch during use. It mainly controls the position of the tube-sheet welding torch through the principle of balance. With the elastic chuck, it can quickly and accurately find the center of the tube and proceed smoothly. Welding, mainly used with TP060 welding torch (elastic chuck structure). Structural situation of large tube sheet suitable for welding large heat exchangers

#### Performance

It is convenient and fast to move;

The load is adjustable to achieve the best operating state;

load(kg)	9-15
Journey(mm)	2000
Weight (kg)	3.8
