Our Product Introduction

Product Description

Fm3.0 Pipe End Flattener

Description

It is specially designed for stainless steel thin-wall pipe end processing.
It is specially designed for processing the end face of stainless steel thin-walled tubes;
The processing tool has a very high surface quality pipe end plane without burr,and the end face is 100%vertical;
Wide processing range(OD6mm~76mm);Special supports can be used for beveling;
Two-edge high-efficiency coated blade;
Imported adjustable speed motor drive,more powerful function;
Ideal pre-welding preparation tools and equipment for automatic welding and manual welding are light,portable and safe to use.

Technical parameter

Model	FM3.0	Dimension	435*425*195mm(17.0*16.7*7.7inch)
Power supply	AC200V 50/60Hz	Power	1010W
Speed	8-45r/min;23-140r/min	Processing materials	Stainless steel, low alloy steel, aluminum, copper
Weight	7.4kg	Noise intensity	About 88db
Outer diameter of pipe	6~76mm (0.23~3 inch)	Maximum thickness	3mm(0.118inch)
