

FM1.0X Pipe End Flattener For Small Diameter Stainless Steel Thin Wall Pipe

Basic Information

Product Specification

- Highlight:
Thin Wall Pipe Flattener ,
Thin Wall tube flattener ,
Small Diameter Pipe Flattener

Product Description

FM1.0X Pipe End Flattener

Description

It is specially designed for small-diameter stainless steel thin-wall pipe end processing. Processing pipe end planes with very high surface quality; No burrs, 100% vertical end face; Wide processing range (OD 3mm~25.4mm); Two-edge highly effective coated blades; Imported variable speed motor drive, more powerful; Ideal pre-weld preparation tools for automated and manual welding. Car battery, no need for external power supply, handheld end processing; The device is lightweight, portable and safe to use; The device is equipped with two battery panels, which make charging work well.

Performance

Note of clamp: when ordering, it is necessary to measure the outer diameter of the pipe, and the outer diameter of different standard pipes is different; Provide fixture customization with special pipe diameter. The tool holder is equipped with tool fixing screws, which is suitable for flat and groove processing of stainless steel pipe fittings--It is divided into single knife and double knife structures;

Technical parameter

Model	FM1.0	Dimension	230*55*265mm(9.05*2.16*10.43inch)
Power supply	18V 1.3AH	Power	--
Speed	0-350r/min	Processing materials	Stainless steel, low alloy steel, aluminum, copper
Weight	1.8kg	Noise intensity	About 50db
Outer diameter of pipe	3-25.4mm (0.118-1.0inch)	Maximum thickness	2mm(0.079inch)
