

OD-Mounted Auto Feed Portable Pipe Beveling Machine For Pipeline Prefabrication

Basic Information

Product Specification

- Highlight:
Auto Feed Pipe Beveling Machine,
OD Mounted Pipe Beveling Machine,
OD Mounted pipe beveler machine

Product Description

Description

This series of products is designed for narrow working space and small-diameter pipe groove. It is applicable to pipe groove processing and on-site maintenance of professional equipment such as water wall, superheater, reheater, boiler, thermal power plant, etc., to meet the processing requirements of narrow working space and large maintenance batch on the pipeline maintenance site

Performance

It is processed with tungsten steel blade, with longer service life and more wear resistance. It can process various grades of carbon steel, alloy steel, stainless steel and other materials. It adopts external clamping device, standard cushion block, accurate positioning, convenient disassembly and assembly. It is equipped with original German imported Matteo motor, with superior quality. The automatic feed and retreat design greatly reduces the labor intensity and improves the service life of the machine. This series machine adopts METABO motor, main applied in the field of power plant pipeline installation, chemical industry, shipbuilding, especially pipeline prefabrication and low clearance on site working, such as maintain thermal power auxiliary equipment, boiler pipe valve.

Technical parameter

Model	Processing scope(mm)	Groove wall thickness(mm)	Speed(rpm)	Diameter(mm)
AF-63C	Φ28-63.5	≤12	45-260	28,32,42,45,48,51,54,57,60,63.5
AF-76C	Φ42-76	≤12	45-260	42,45,48,51,54,57,60,63.5,68,76
AF-89C	Φ63-89	≤12	45-260	63.5,68,76,83,89
AF-114C	Φ76-114	≤12	45-260	76,83,89,95,102,108,114
