

Coal Mine Machinery Hydraulic Support Welding System

Basic Information

Product Specification

- Welding System: MAG Welding System
- Application: Medium And Heavy Plate Structural Parts
- Maximum Load: 10000kg
- Highlight: **MAG welding system, Hydraulic Support Welding System**

Product Description

11-axis linkage;
3-axis gantry suspended 6-axis robot provides maximum workspace and system flexibility;
The maximum load of the two-axis head and tailstock robot positioner can reach 10000KG;
Efficient MAG welding system;
Perfect arc welding function software for medium and heavy plate structural parts;
Workpiece automatic temperature measurement and reheating system.
