Product Description

Head Frame Positioner Type Pipe Welding Workstation

Description

Use as a single set or with the production line
Can carry out welding of various types of pipe fittings such as pipe-pipe, pipe-flange, pipe-elbow, pipe-head, pipe-tee, etc
According to different welding processes, the pipeline can be primed, filled, and covered with welding
Multi-welding process combination to achieve high-efficiency hot wire TIG, cold wire TIG, MAG, SAW, narrow gap TIG/SAW and other multi-functional welding
The operation is simple in the industry, and inexperienced operators can quickly get on the job through simple training
Fast welding efficiency and low operating skills
Suitable for single head welding
Relatively good value for money

Technical parameter

Control Method:	PLC+touch screen+wire controller centralized control
Equipment Model Parameters:	For details, please refer to the introduction of the sample head holder positioner P39
