

## Head Frame Positioner Type Pipe Welding Workstation Fast Efficiency

Our Product Introduction

for more products please visit us on [huahengautomation.com](http://huahengautomation.com)

### Basic Information

### Product Specification

- Highlight: Positioner Type Pipe Welding Workstation, Welding Workstation Fast efficiency, Fast efficiency welding work station

### More Images

### Product Description

Head Frame Positioner Type Pipe Welding Workstation

## Description

Use as a single set or with the production line

Can carry out welding of various types of pipe fittings such as pipe-pipe, pipe-flange, pipe-elbow, pipe-head, pipe-tee, etc

According to different welding processes, the pipeline can be primed, filled, and covered with welding

Multi-welding process combination to achieve high-efficiency hot wire TIG, cold wire TIG, MAG, SAW, narrow gap TIG/SAW and other multi-functional welding

The operation is simple in the industry, and inexperienced operators can quickly get on the job through simple training

Fast welding efficiency and low operating skills

Suitable for single head welding

Relatively good value for money

## Technical parameter

Control Method:	PLC+touch screen+wire controller centralized control
Equipment Model Parameters:	For details, please refer to the introduction of the sample head holder positioner P39
