

Turbine Blade Robot Welding System Autonomous Manufacturing Systems

Basic Information

Product Specification

- Highlight: **Turbine Blade Robot Welding System, Turbine Blade Autonomous Manufacturing Systems**

Product Description

Master-slave control, 18-axis link;
2-axis C-type support and 6-axis robot provide maximum workspace and system flexibility;
The maximum payload of the 2-axis robot positioner can reach 5000KG;
Hot wire TIG welding system;
Molten pool image monitoring;
Seam location and arc voltage control.
